PROLOGUE

In 2112, the United States suffers an economic collapse accompanied by social chaos, civil unrest and a breakdown of law and order. In response to the emergency, the President exercises extraordinary powers to preserve the United States. This Constitutional Dictatorship led to the elimination of many personal freedoms, a secret police of Enforcers

AND THE BIRTH OF X-ISLE

As a result, the justice system as we know it was abolished, and two divided sides have risen:

THE TORCHBEARERS AND THE FREEDOM FIGHTERS.

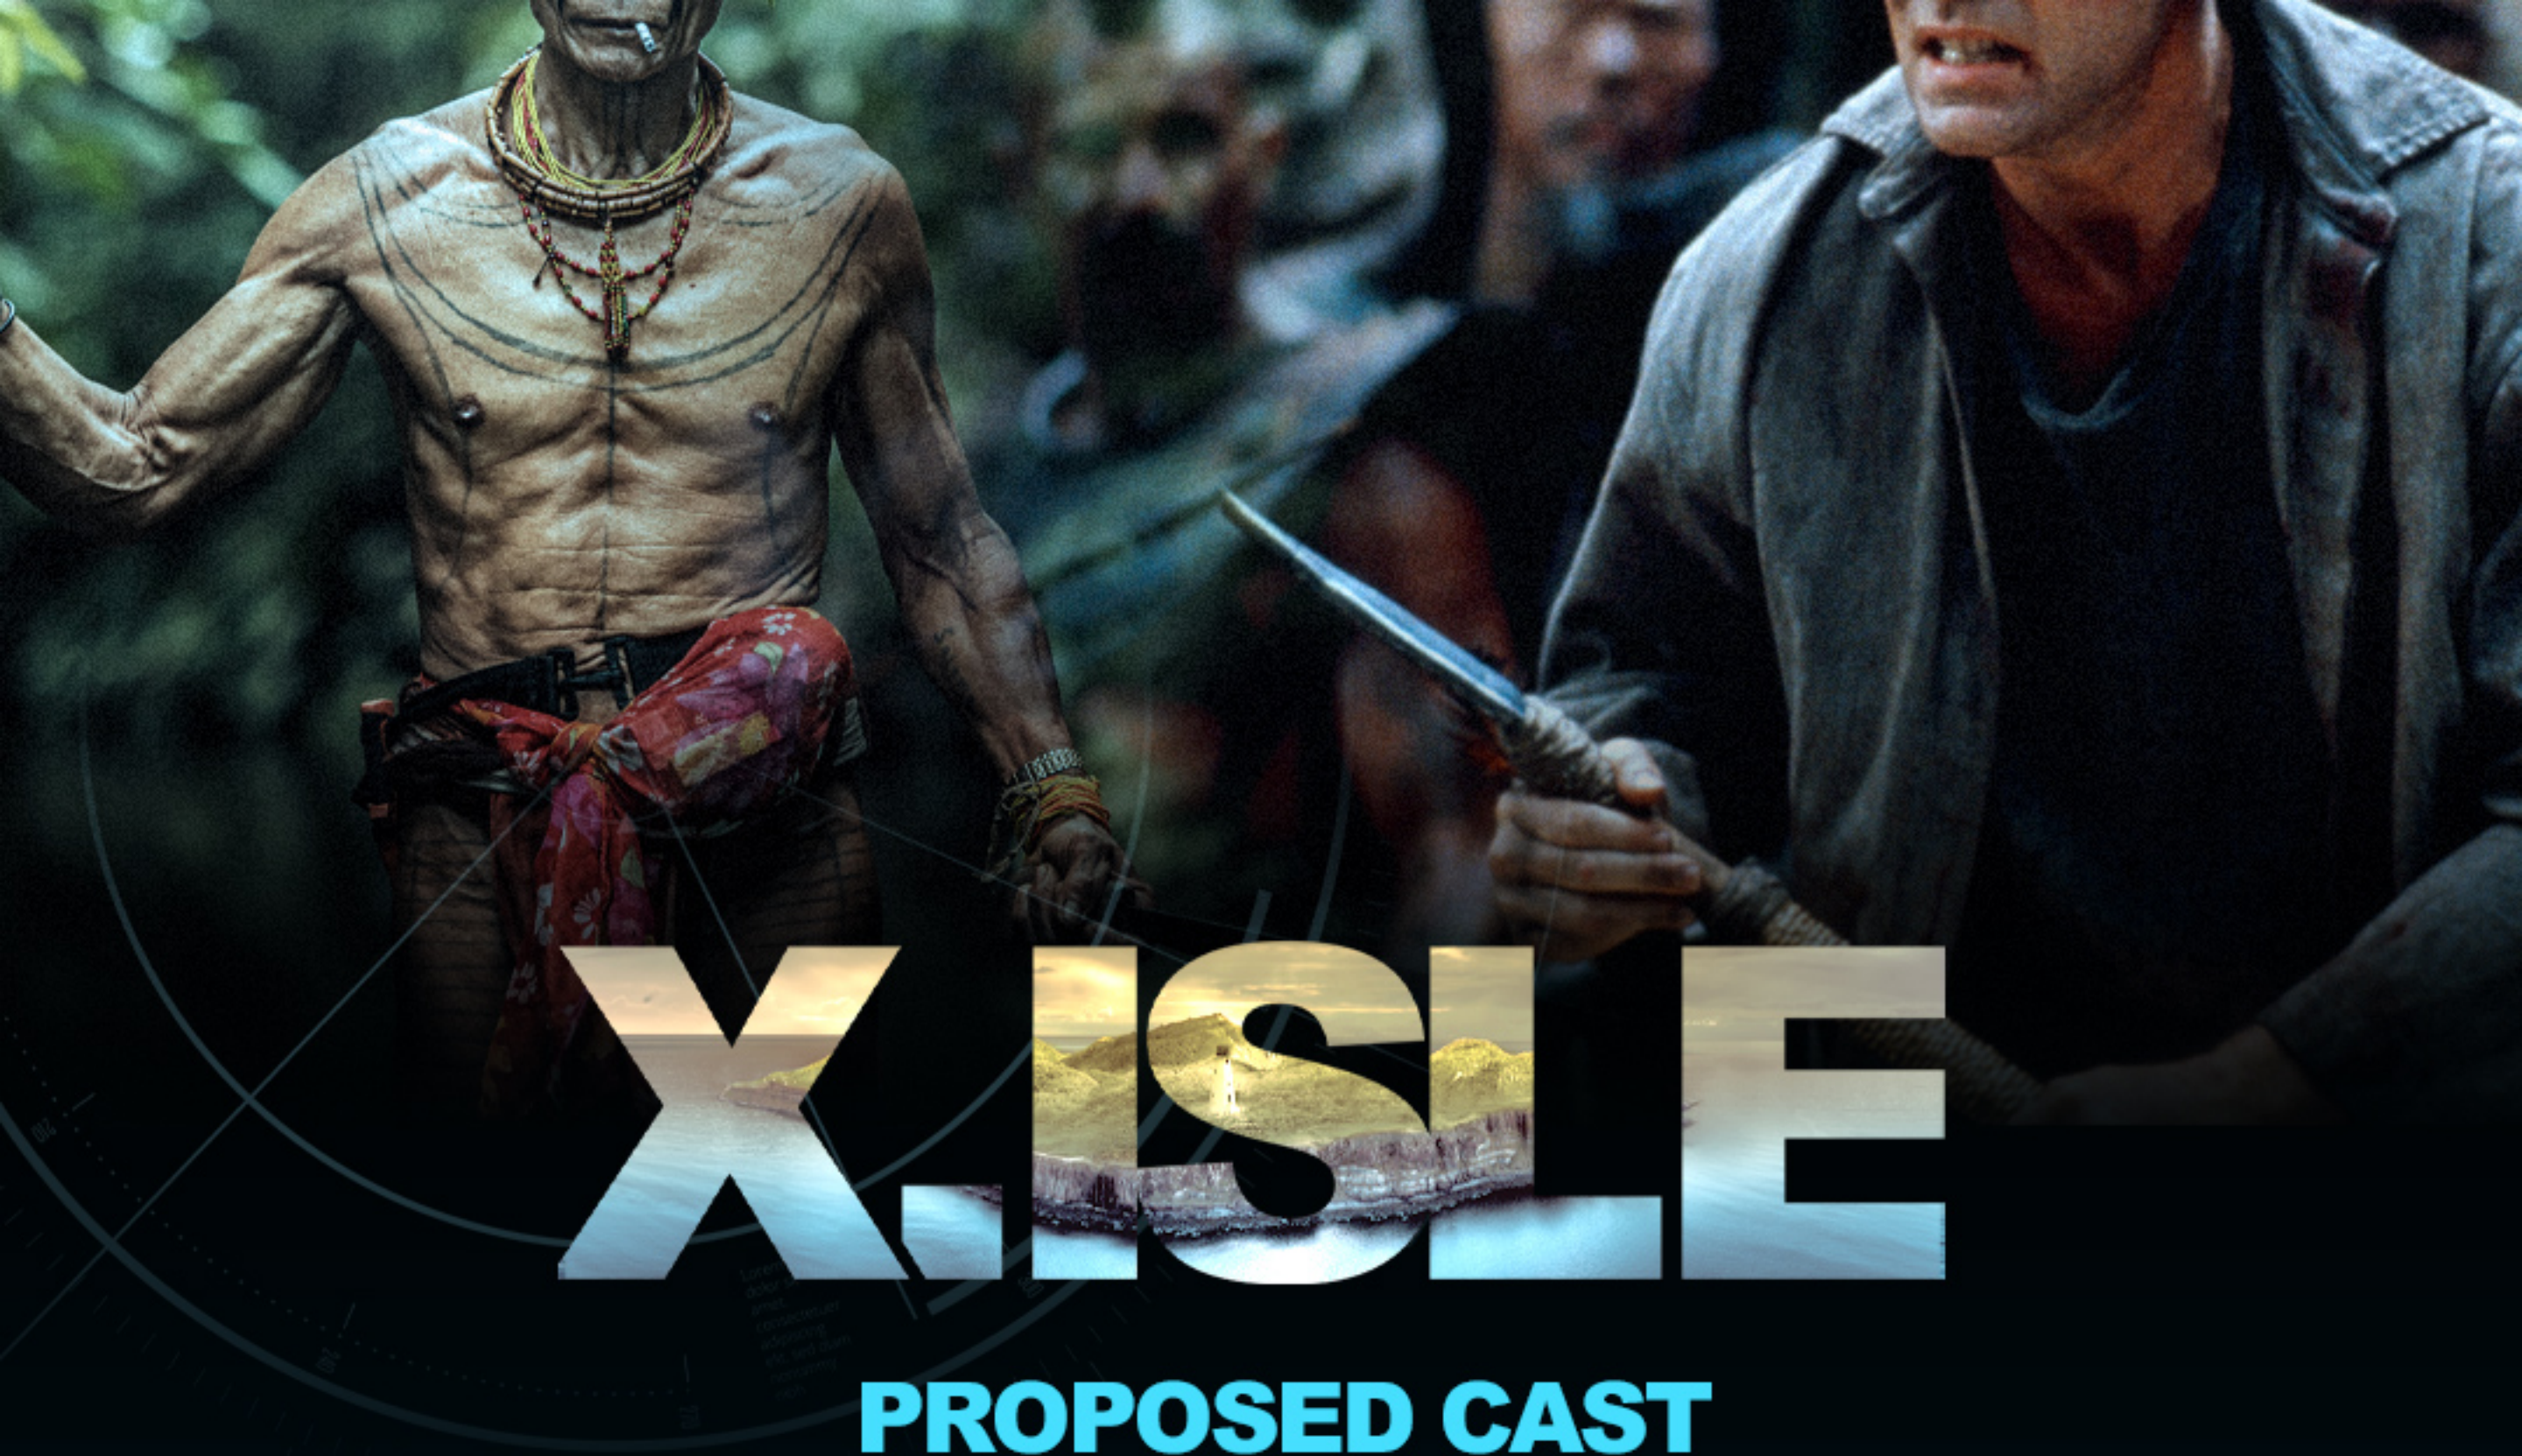

SYNOPSIS

In the future, the justice system as we know it is abolished and all prisoners are sent to a remote island called X-ISLE. Spurred by a loss of situational controls and revenge against active threats to her reign, President Celestine Sage attempts to enlist Declan, a retired military officer, to wipe out the Island with a highly unstable Francium Bomb. When he refuses, she sets a plan in motion and exiles him to die on the island. But then Sage's daughter is kidnapped and the only person who knows where to find her is incarcerated on X-Isle.

AND THE ONLY MAN WHO CAN HELP SAVE HER IS DECLAN.
